HEART ATTACK

DYNAMIC FILTER PEDAL
FOR BASS AND GUITAR
INSTRUCTION MANUAL

- EXPRRESSIVE DYNAMIC FILTER PEDAL
- PRODUCES A SWEEPING HARMONIC PHASE SHIFTING EFFECT THAT
  IS PICK ATTACK SENSITIVE
- SWEEPS THE FREQUENCY SPECTRUM FROM HIGH TO LOW
- SENSITIVITY CONTROL ALLOWS FOR A WIDE SWEEP OF THE EFFECT
- HEAVY DUTY CHASSIS WITH EASY ACCESS BATTERY COMPARTMENT

MAY BE COVERED BY ONE OR MORE OF THE FOLLOWING U.S. PATENTS
5,452,297, 6,663,506, 6,468,204, 4,749,329, 4,661,087, 6,933,099, 5,124,667, 5,220,091,
Other patents pending. Twelve patents pending.
Your Heart Attack™ pedal has been tested and complies with the following Standards and Directives as set forth by the European Union:

**Standard(s):** EN55013, EN50082-1

This means that this product has been designed to meet stringent guidelines on how much RF energy it can emit, and that it should be immune from other sources of interference when properly used. Improper use of this equipment could result in increased RF emissions, which may or may not interfere with other electronic products.

To insure against this possibility, always use good shielded cables for all audio input and output connections. This will help insure compliance with the Directive(s).

For more information about other Rocktron products, please see your local dealer or one of our importers closest to you (listed on the Rocktron website - www.rocktron.com).

**Precautions**
Read all instructions contained in this manual.
Keep these instructions
Heed all warnings
Follow all instructions.
Do not use this apparatus near water.
Clean with dry cloth
Precautions Continued....

Do not block any ventilation openings (if applicable). Install in accordance with the manufacturer’s instructions.
Do not install near any heat sources such as radiators, heat registers, stoves or other apparatus (including amplifiers) that produce heat.
This product is not equipped with a plug or cable. This pedal runs on a 9 Volt Battery, if a 9 Volt DC adapter is used please follow adapter manufacturer’s operation instructions.
Only used attachments/accessories specified by the manufacturer.
Do not use this product with any case, stand tripod, bracket or table that is not specified by the manufacturer. Insure that the case, stand, tripod, bracket etc. is properly adjusted and setup (follow all instructions). Extra care and caution should be taken to avoid tip over and injury.
Unplug this apparatus during lightning storms or when unused during long periods of time.

Refer all service to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power supply or plug is damaged, liquid has been spilled or objects have fallen into the apparatus or if the apparatus has been exposed to rain or moisture, does not operate normally or has been dropped.

DO NOT ATTEMPT TO SERVICE THIS EQUIPMENT. QUALIFIED PERSONNEL SHOULD SERVICE THIS EQUIPMENT ONLY. DO NOT MAKE ANY INTERNAL ADJUSTMENTS OR ADDITIONS TO THIS EQUIPMENT AT ANY TIME OR TAMPER WITH INTERNAL ELECTRONIC COMPONENTS AT ANY TIME. FAILURE TO FOLLOW THESE INSTRUCTIONS MAY VOID THE WARRANTY OF THIS EQUIPMENT AS WELL AS CAUSING A SHOCK HAZARD.

OPERATING TEMPERATURE

Do not expose this unit to excessive heat. This unit is designed to operate between 32 F and 104 F (0 C and 40 C). This unit may not function properly under extreme temperatures.
Introduction
Congratulations on your purchase of the Rocktron Heart Attack.

The Heart Attack Dynamic Filter pedal produces a harmonic phase shifting effect that sweeps the frequency spectrum from high to low. It is ideally suited for bass and can also be used by guitarists.

The dynamic filter effect is triggered by pick attack. The harder you pick the string, the louder the effect. The Sensitivity control allows for frequency adjustment of the effect. Lower settings provide for a lush, smooth feel - ideal for locking in with a drummer and providing a solid low-end. Higher settings provide a more expressive effect that is ideally suited for lead breaks. Play around with it - you will find that there are tons of possibilities as the effects volume and sound is mainly produced by your pick attack!

We have also included “distortion” to give you a little more “grit” when playing.

The easy access battery compartment will make changing batteries during a gig a breeze. We have also equipped it with a super bright blue LED so you will know when the pedal is on...it is also just plain cool!

Enjoy
Connection
Controls
Controls

1. Sensitivity Control - Adjusts the sensitivity of the effect. Turning this control clockwise increases the sensitivity of the effect. Turning it counterclockwise decreases the sensitivity of the effect.

2. Active LED - When lit the pedal is "active" or "on".

3. Distortion Button - When the button is pressed “in” the distortion is on. When the button is “Out” the distortion is off.

4. DC 9V Input - To use external power (not provided) use only a 9-Volt DC adapter.

5. Input - Using a standard guitar cable with a 1/4” jack, plug your guitar into this jack.

6. Output Jack - Using a standard guitar cable with a 1/4” jack, connect to your next effect or directly into your amplifier.

7. On/Off Switch - This switch determines whether the pedal is “on” or “off” - When ON the blue LED will be lit. When OFF the LED will not be lit.

8. 9-Volt Battery Compartment - to access pull on small tab labeled “OPEN”. Replace with a new 9-Volt battery. Always remember to unplug your guitar cords from the pedal to conserve battery life. Some battery drain may take place when unit is plugged in (even if the unit is bypassed).

Hints and Tips:

The Heart Attack pedal usually sounds better when placed after distortion in the signal chain. However, the Heart Attack can be used either before or after a distortion.

If using multiple pedals such as delays and other modulation effects, try the Heart Attack in different parts of the signal chain until you find the sound you like best.

If you have an effects loop in your amplifier - try putting the Heart Attack in the effects loop for a different sound (please follow all instructions in your amplifier manual when connecting to your effects loop).
